

Review various “types” of planners and brainstorm what you will need for your wedding - full service, a la carte services, day-of coordination, event design

You need to be VERY comfortable with your wedding planner. Do you feel listened to? DO YOU LIKE THEM?

Do they seem collected and organized during your in-person meeting and phone calls?

Have they ever worked at your venue?

Are they willing to work with vendors that you select, or do they require you to work with vendors they recommend?

How many meetings, phone calls, emails are included with what you pay for?

Are there any fees NOT included in the proposal or contract that you should be aware of?

Ask for recommendations from past clients

Search via Google for any posted online feedback that may be valuable in guiding your decision.
